Release PV7.3.0 SV132

This release includes several enhancement requests and bug fixes to continue enabling an intuitive OneStream data exploration experience.

Prerequisites

- Uninstall previous version before installing this release.
- Reenter Solution License Key after installation.

Fixed Issues

- Incorrect sorting options for Standard Drill (#3284).
- Object reference error when trying to link "All Cube View Groups" when Workspace is Not Shareable (#3243).
- Bug using Flow as Variance Dimension (#3301).
- Drill to Detail: Journals Failing - Invalid Column Name (#3312).
- SV130 Uninstall UI/Full - Unable to Delete Cube View Group - Doesn't remove all components (#3298).
- Cube not refreshing when you select a different Saved POV (#3316).
- Matrix Drill is crashing on large UD1 dimension (#3293).
- Saved POV not switching in the Variance Options (#3317).
- When switching from Matrix to Variance the refresh is not working properly (#3318).

- When selecting Matrix the refresh button is not green (#3319).
- The Variance Time offset is not working correctly when OneStream Analytic Drill Down launched from a Cube View (#3327).
- Source connections not properly updating when using the Import Config button (#3299).

Known Issues

Variance amounts not calculated correctly when certain dynamic members are used within the POV due to the default OneStream calculation order of operation sequence (#2956). See Solution Guide section “Viewing Certain Dynamic Members along with Variance Calculations” or OneStream Support for optional work-around.

Compatibility

Component	Description
OneStream 7.3.0 or later	Minimum OneStream Platform version required to install this version.
