Line Item Modeling Release

PV9.0.0 SV120

This is the initial release of Line Item Modeling.

Compatibility

- Minimum Platform Version 9.0.0 is required.
- Minimum SQL Server 2017 is required.

Known Issues

- When a user calculates a plan that uses a formula containing only a Global Driver, it results in an error during execution. To avoid this issue, add an additional operation to the formula. (MP2-4244)

Recommendations

- **IMPORTANT:** People Planning and Thing Planning solutions will continue to be supported for existing implementations until September 30, 2027. It is highly encouraged that customers upgrade their environments to the minimum Platform Version of 9.0.0 to implement the Line Item Modeling solution in regard to Workforce, Fixed Term, or Duration Based planning initiatives. Installing the Line Item Modeling solution will not impact current People and Thing Planning implementations. However, the People Planning and Thing Planning solutions will be subject to the September 30, 2027 end of support date.
