System Diagnostics Release

PV8.5.0 SV102

The theme of this Hotfix release is bug fixes.

Fixed Issues

- When running System Diagnostics in an SQL Managed Instance environment, you are able to run a new Snapshot without error. (MP3-7837)

Compatibility

- This solution is compatible with OneStream Platform v8.

Documentation

- The solution Help icon now prompts a dialog where you can access help documentation. (MP3-7840)
- The *System Diagnostics Guide* has not been updated except to change the release number and copyright if necessary.

System Diagnostics Release

PV8.5.0 SV101

The theme of this Hotfix release is a documentation update.

Compatibility

- This solution is compatible with OneStream Platform v8.

Documentation

- We've enhanced and streamlined the documentation by removing references to internal, non-customer facing features. (MP3-7454)

Release PV8.5.0 SV100

The theme of this major release is the introduction of the AI System Diagnostics dashboard.

Prerequisites

- This solution is compatible with OneStream Platform v8.

New Features

- AI System Diagnostics builds on the capabilities of System Diagnostics by introducing the ability to scan custom code within the application for inefficiencies and poor coding practices that may negatively impact performance. The AI System Diagnostics dashboard automatically installs when downloading System Diagnostics, and is a paid add-on which runs on a 9.0 Minimum OneStream Platform version. Please contact your Account Executive to access the AI Studio.

Deprecation

- The following feature is scheduled for removal in this release in accordance with our sunset policy:
 - Live monitoring (MP3-6654)
