System Diagnostics Release

PV8.5.0 SV120

The theme of this Minor release of System Diagnostics is enhancements and bug fixes for continued optimal operations.

Enhancements

- In an SQL Managed Instance environment, you can take an environmental snapshot and open a more user-friendly Database Sizes report. The pie chart at the top of the report displays the Used and Available space, with the Available label stating the amount of GB space remaining, alongside the percentage. (MP3-7870)

Fixed Issues

- Components that are included and saved within System Diagnostics should have unique names to avoid conflicts with components that exist in other Maintenance Units. (MP3-8053)
- When running either a report package or an application snapshot, these functions should operate as expected when converting the data type carrier to an integer. (MP3-8764)

Upgrade Information

- This release requires an overinstall of the existing installation. Reach out to your OneStream Software representative for questions regarding this process.

Compatibility

- OneStream Platform Version 8.5.0 is the minimum version required to install this version of the solution.

Documentation

- The following content was updated in the *System Diagnostics* Guide:
 - Release number
 - Environment Analysis Reports topic was updated to reflect the enhancements added. (MP3-7870)
 - Monitor Task Health and Monitor Environment Health content was removed. (MP3-8417)

System Diagnostics Release

PV8.5.0 SV111

The theme of this Hotfix release is bug fixes.

Fixed Issues

- When launching System Diagnostics, the solution will load seamlessly. (MP3-8730)

Upgrade Information

- This release supports an overinstall over the existing installation. Reach out to your OneStream Software representative for questions regarding this process.

Compatibility

- OneStream Platform Version 8.0.0 is the minimum version required to install this version of the solution.

Documentation

- The *System Diagnostics Guide* has not been updated except to change the release number and copyright if necessary.

System Diagnostics Release

PV8.5.0 SV110

The theme of this Minor release is enhancements and bug fixes.

Enhancements

- When launching the AI System Diagnostics dashboard, cache will refresh, showing the newest changes. (MP3-7535)
- In AI System Diagnostics the UI has been enhanced for an improved user experience. (MP3-7376)

Fixed Issues

- In Application Analysis, you are able to run a new snapshot without error when the name column has a non-numeric value such as a '#' or a '*' character. (MP3-3266)

Compatibility

- This solution is compatible with OneStream Platform v8.

Documentation

- The *System Diagnostics Guide* has not been updated except to change the release number and copyright if necessary.

System Diagnostics Release

PV8.5.0 SV102

The theme of this Hotfix release is bug fixes.

Fixed Issues

- When running System Diagnostics in an SQL Managed Instance environment, you are able to run a new Snapshot without error. (MP3-7837)

Compatibility

- This solution is compatible with OneStream Platform v8.

Documentation

- The solution Help icon now prompts a dialog where you can access help documentation. (MP3-7840)
- The *System Diagnostics Guide* has not been updated except to change the release number and copyright if necessary.

System Diagnostics Release

PV8.5.0 SV101

The theme of this Hotfix release is a documentation update.

Compatibility

- This solution is compatible with OneStream Platform v8.

Documentation

- We've enhanced and streamlined the documentation by removing references to internal, non-customer facing features. (MP3-7454)

Release PV8.5.0 SV100

The theme of this major release is the introduction of the AI System Diagnostics dashboard.

Prerequisites

- This solution is compatible with OneStream Platform v8.

New Features

- AI System Diagnostics builds on the capabilities of System Diagnostics by introducing the ability to scan custom code within the application for inefficiencies and poor coding practices that may negatively impact performance. The AI System Diagnostics dashboard automatically installs when downloading System Diagnostics, and is a paid add-on which runs on a 9.0 Minimum OneStream Platform version. Please contact your Account Executive to access the AI Studio.

Deprecation

- The following feature is scheduled for removal in this release in accordance with our sunset policy:
 - Live monitoring (MP3-6654)
