Workforce Planning Express

Release PV9.0.0 SV2.0.0

This is the initial release of Workforce Planning Express. Workforce Planning Express PV9.0.0 SV2.0.0 is a packaged solution that merges leading-practice designs with ready-made configurations, helping organizations quickly achieve results through an established delivery method. It supports organization-wide planning for headcount and position adjustments, including new hires, transfers, terminations, and employee changes over time, tracked by date. The solution also addresses compensation, benefits, and other workforce-related costs.

Compatibility

- Minimum Platform Version 9.0.0 is required.
- Minimum SQL Server 2017 is required.
- PV9.0.0 SV2.0.1 Line Item Modeling (LIM) is required.

Prerequisites

- Customers must download Line Item Modeling (LIM) and have Workforce Planning installed.

Upgrade Information

- Prior to upgrading, ensure that you review the Upgrade Instances section of the PV9.0.0 SV2.0.0 Workforce Planning Express Guide.

New Features

- None

Enhancements

- Updated documentation to support the transformation of incoming Register data. This includes changes to the WPX Solution Guide and the supporting sample reference files in the Workforce Planning Import Register Connector Code folder within the WPX package. (SN8-1777)
- Across the Workforce Planning Express solution, documentation, and accompanying resources, the references to the PLN acronym have been changed to reference LIM. (SN8-1373)

Fixed Issues

- Global Entity will now appear in the Entity combo box on the Drivers Input page even if the Global Entity Member Filter selected is not a child of the Entity Member Filter. (SN8-1852)

Known Issues

- None
