Xperiflow Administration Tools

Release PV9.3.0 SV2.6.0

The theme for this Hotfix release for Xperiflow Administration Tools is OpenTelemetry Redesign

Enhancements

- **OpenTelemetry Redesign:** This release changes how telemetry information is passed through in each solution.

Dependencies

XPFv4.4.0

XBR-SV240-XPFv4.4.0-PV930

Known Issues

- When scrolling through a large amount of users filtered by name, the add user table does not display all users beyond 500.

Compatibility

- Use OneStream Platform Version 9.3.0 or later and Xperiflow Version 4.4.0 or later with this version. OneStream recommends upgrading to the latest platform version.

Xperiflow Administration Tools

Release PV9.3.0 SV250

The theme of this Major release is WCAG 2.1 AA compliance.

Enhancements

- **Updated validation for App Copy Scopes:** The Validate function has been updated to support App Copy Scopes, improving accuracy during scope validation workflows.
- **Improved error messaging for non-administrator users:** Users without administrator permissions now receive a clearer, more helpful error message when attempting restricted actions in XAT.
- **Added MCP Client Application Name setting to Global Settings:** A new dropdown in Global Settings allows administrators to configure which OneStream application external authentication clients will target when connecting through MCP. The dropdown lists all available OneStream applications on the environment, enabling administrators to direct MCP traffic to the correct application without requiring the external client to specify it.
- The solution is WCAG 2.1 AA compliant, including but not limited to:
 - Keyboard navigation
 - Screen readers
 - Color contrast

Resolved Issues

- **Table column headers no longer display underscores in BUX environments:** Column headers in populated tables now render correctly without underscores.
- **"Created At" date now displays the correct time:** The timestamp shown in the "Created At" field has been corrected.
- **Special characters are now blocked in naming fields:** Naming inputs now validate against special characters to prevent invalid entries.
- **Fixed capitalization of "OneStream ID":** The "OneStream ID" label now displays with correct capitalization throughout XAT.
- **Edit Group modal no longer opens without a row selected:** Clicking Edit Group without selecting a row no longer opens an empty modal.
- **Removed internal error details from user-facing error messages:** Error messages no longer expose internal technical details.
- **Fixed permission selection behavior:** Resolved an issue where selected permissions were not applied correctly and would not display assigned roles.

Dependencies

XBR-SV230-XPfv4.3.0-PV930

Xperiflow v4.3.0

Known Issues

- When scrolling through a large amount of users filtered by name, the add user table does not display all users beyond 500.

Compatibility

- Use OneStream Platform Version 9.3.0 or later and Xperiflow Version 4.3.0 or later with this version. OneStream recommends upgrading to the latest platform version.
