Xperiflow Cloud Tools Release

PV9.0.0 SV220

The theme of this Minor release is enhancements and bug fixes for Xperiflow Cloud Tools.

Enhancements

- Support is enabled for the Modern Browser Experience.
- Error handling is improved to communicate issues more effectively to the user when they occur.
- Endpoint and URI parsing is improved to simplify implementations.
- Timeout is increased from 10 minutes to 15 minutes when performing the Server Upgrade step.

Fixed Issues

- Server upgrades cannot be started while a job is still running.

Compatibility

- Use OneStream Software Platform Version 9.0.0 or later and Xperiflow Version 3.0.0 or later with this version. OneStream recommends upgrading to the latest platform version.

Xperiflow Cloud Tools Release

PV9.0.0 SV211

Prerequisites

Use OneStream Software platform version 9.0.0 or later with this version and Xperiflow version 4.0.1 or later.

New

- Updated to newest versions of Shared Library and Solutions Layout Frameworks.
- Enhanced logic for parsing environment name and Base URL.

Known Issues

- In specific situations where a web service request encounters an error, the user interface fails to update to indicate an error state.
