# Release PV600 SV100

The theme of this release is enhancements within Cloud Administration Tools and updates to the documentation for installation guidance.

## Prerequisites

- This solution is compatible with OneStream Platform v8.
- This release requires a minimum 6.0 Platform release.
- This release supports an overinstall for previous releases. Reach out to your OneStream Software representative for questions regarding the overinstall process.
- OneStream strongly recommends uninstalling the UI for Cloud Administration Tools before installation. Any modifications to settings must be redone.

## New Features

### Application Management

- System administrators can:
  - Copy, replace, or create new applications across environments. (MP3-2823)
  - Remove applications in an environment. (MP3-2725)
  - Reset environments manually using the Reset IIS functionality. (MP3-2800)

### Key Management

- System administrators can:
  - Manage key security by uploading a key certificate to the Azure Key Vault. (MP3-2950)

- Enable or disable the functionality to manage the Azure Key Vault. (MP3-3034)
- Access Secrets and Certificates (only administrators on Platform 8.0). (MP3-3699)

## Enhancements

- Reset IIS automatically queues when applications are copied or removed. (MP3-3507)
- Cloud Administration Tools home page displays key performance indicators and an overview of actions taken in User Management and Application Management. (MP3-3395)

## Fixed Issues

None

## Known Issues

None
