Release PV600 SV100

The theme of this release is enhancements for Load Test Suite.

Deployment

- This release of Load Test Suite should be deployed for on-premise use only.
- This release requires a minimum 6.0 Platform release.
- Over-install on previous versions is not supported or recommended for this release. If a previous version exists in your environment, reach out to your OneStream Software representative.
- Load Test Suite requires the use of OneStream Studio to support the use of the Studio API's during the load testing process. See *Installing the Studio Client Package* in the *Installing Client Components* section of the *Installation Guide* for more information.
- Load Test Suite requires the installation and setup of the Powershell Solution located on MarketPlace. See the *Load Test Suite Configuration* section of the *Load Test Suite Guide* for more information.

New

- Updated user interfaces to reduce redundancy and/or comply with OneStream Software standards. This includes the following:
 - OnePlace dashboard and header for Load Test Suite (MP3-1704).
 - Settings Page with Uninstall UI option (MP3-1736).
 - The Load Test Suite Overview tab (MP3-1706).
 - The Cube View Sequence Comparison tab (MP3-1773).
 - The Load and Process Sequence Comparison tab (MP3-1776).

- The Consolidation Sequence Comparison tab (MP3-1778).
- The Test Detail Pivot tab. (MP3-1778).
- Updated Guide with additional details regarding the configuration and installation process. (MP3-1771, MP3-1781)

Changed

- None.

Fixed

- None.

Known Issues

- On platform versions PV620 and higher, performance degradation occurs when high concurrent user tests are imported within the same Workflow Profile, Scenario, and Year.
