Release PV810 SV101

This release includes minor updates to reflect the most recent XperiFlow engine updates and enhance performance during an engine upgrade.

Prerequisites

Use OneStream Software platform version 8.1.0 or later with this version.

New

None.

Changed

Revise the validation process for XperiFlow web service request responses to ensure compatibility with all current and previous versions of the XperiFlow engine.

Fixed

During an environment upgrade, close the planned outage that occurs with server rescaling to avoid interruptions during telemetry reporting.

Known Issues

In specific situations where a web service request encounters an error, the user interface fails to update to indicate an error state.

Contacting Support

OneStream Support can be contacted at any time by registering at <http://support.onestreamsoftware.com> and then emailing support@onestreamsoftware.com.
