Release PV8.5.0 SV110

The theme for this minor release is enhancements and bug fixes.

Enhancements

- Added scrollable view to Data Management Steps on the Metadata Import page. (MP4-6037)
- In the Request Profile dimension picklist, only assigned Dimension Names are available. (MP4-5966)

Fixed

- UD1 member moves parents within the hierarchy associated with the member filter. (MP4-5927)
- When exporting 'None' member, the Sort Order is correct. (MP4-5602)
- When exporting Flow dimension the aggregation weight is correct. (MP4-5127)
- Failed Commit requests status remains "Failed" after a profile change. (MP4-5926)
- Administrators can commit self-initiated requests when Testing Mode is turned OFF. (MP4-5882)
- Processing an SSI file with a Request Profile that has the Add action disabled will now process successfully without error. (MP4-5877)

Known Issues

- On Platform version 9.1, in Mass Update, selecting "Save As File On Local Folder" saves a blank spreadsheet. As a workaround, select "Save As File In OneStream", "Save As Application Workspace File", or "Save As System Workspace File". (PF-36456)

Release PV8.5.0 SV102

The theme for this Hotfix release is bug fixes.

Fixed

- Copying and Moving an existing member to new parents within the same SSI request shows within the same request. (MP4-5876)
- Move member displays Current Parent within the detail. (MP4-5757)

Release PV8.5.0 SV101

The theme for this Hotfix release is bug fixes.

Fixed

- Workspace Assemblies compile when accessing ACM. (MP4-5755)

Documentation

- The solution Help icon prompts a dialog where you can access online help documentation. (MP4-5849)

Known Issues

- Some Data Management jobs produce an error stating "Violation of PRIMARY KEY constraint. Cannot insert duplicate key in object." (MP4-5916)
- When processing an SSI file, User-Initiated request, or Mass Update, the Alias property is cleared from members. (MP4-5921)
- Copying and Moving an existing member to new parents within the same SSI request is showing two copy line items. (MP4-5876)
- Administrators may not be able to commit self-initiated requests when Testing Mode is turned OFF. (MP4-5882)
- When exporting 'None' member, the Sort Order is being set to 0. (MP4-5602)

- Moving a member is not displaying the current parent within the item details when using SSI. (MP4-5737)

Release PV8.5.0 SV100

The theme for this major release is browser compatibility and bug fixes.

Enhancements

- Rebrand application to align with OneStream branding. (MP4-4745)
- Refactor Mass Update code base from Telerik to DevExpress. (MP4-5475)
- Orphan members can be committed to the Dimension Hierarchy, including their associated properties, in one Source System Import process. (MP4-5324)
- Mass Update supports adding a new member in an extended hierarchy. (MP4-5167)

Fixed Issues

- Over-Installing from a previous release does not throw incorrect validations on Submit of a request. (MP4-5237)
- .tree member filter does not throw error if not capitalized in Dimension Setup. (MP4-5142)
- When multiple dimensions are assigned to a request, you can move an existing member to the same new parent. (MP4-5383)
- Prompt appear to close out requests when loading configuration to prevent errors. (MP4-5339)
- Removed Guid Error when setting a request to "Ready for Commit". (MP4-5371)
- Resolved error when 'Enforce Global POV' is set to True and the Metadata Import Process is executed. (MP4-5686)

Compatibility

This release is compatible with OneStreamPlatform version 8.5 or later.
