Release PV9.1.0 SV100

This theme of this initial release is Forecast Value Add and small functionality enhancements.

Compatibility

Use OneStream Software platform version 9.1.0 or later with this version and Xperiflow version 4.1.0 or later.

New

- **Addition of Exclusion Toggle for UD Selections in Visualizations**
 - Added exclusion toggle to help you easily sort through configured dimensions.
- **Performance Improvements**
 - Increased performance across visualizations, especially for large dimensions or large amounts of data.

Known Issues

- The current solution is not compatible with BrowserUX.
- Direct export of SensibleAI Forecast DMF tables that use hierarchical forecasting requires manual intervention to populate unused dimension columns with real values.
