Release Notes PV910 SV101

The theme for this Hotfix release is bug fixes.

Fixed

- Planning Framework (PLF) Solution - Parameters discovered in any Cube View assigned to the Model Page were not resolving. Updates to code have been made to resolve.

Release Notes PV910 SV100

CPM Express GAAP PV910 SV100 is a compliant application for consolidation, planning, and reporting - delivered through a productized approach that accelerates time-to-value and ensures predictable, scalable outcomes.

Prerequisites

- The OneStream software platform version 9.1.0 or later is required

New

- Application Zip Deployment – CPM Express is now deployable through an Application Zip file rather than bacpac restoration.
- Data Movement Tool (DMT) Solution – solution intended to facilitate data movement between cubes either through Data Management Export Sequences or Dynamic Scenarios populated through a Business Rule.
- CPM Express GAAP now supports a Planning Cube structure. Base structure has been included in the foundational application and mirrors the Consolidation Cube structure.

Changed

- Planning Framework (PLF) Solution – major updates to the solution including conversion to a Genesis instance and ability to create, update, and manage customer-specific planning models.
- Allocation Express functionality will now be replaced with OneStream Allocations (in the Productivity Pack)

Fixed

- OSE_Cashflow rule has been updated to correctly pull from the A#Cashflow rollup rather than A#BalanceSheet

Known Issues

N/A

Contacting Support

CPM Express projects are supported as regular implementations. Additional resources may be available on OneStream's Community Page.
