CPM Express GAAP Release PV9.3.0 SV1.0.2

CPM Express GAAP PV9.3.0 SV1.0.2 is a productized solution that brings together the leading practices of the world's top-performing organizations for planning, reporting, and consolidations into a unified, scalable solution.

Highlights

- This release was focused on 9.4.0 compatibility.
- OneStream Financial Close solution was upgraded from PV9.0.0 SV2.0.2 to PV9.3.0 SV1.0.0.
- File Explorer Manager fix: The 0_Frame_FEM_OnePlace dashboard type is now set to Embedded Top Level. This resolves the SV1.0.1 known issue.

Compatibility

- The OneStream software platform version 9.3.0 or later is required.
- Line Item Modeling PV9.0.0 SV2.0.0 is required to use Workforce Planning Express.

Known Issues

- CTA exclusion requires manual configuration within flow members associated with account rollups. Customers must update the member in the Remove() function in the ActivityCalc, ActivityCalcAcq, FXOpen, FXMovement, FXOverrideBalance, and FXHistOverrideMovement.
    - Before: A#BalanceSheet.Base.Remove(CXG_CTARollForward)
    - After: A#BalanceSheet.Base.Remove([Your CTA Account Name])
- Cube View Tree View block on Review Page of Planning Framework does not support nested parameters.
- GDR - Selector List View Order resets to default values when discovering parameters on cube view reports in report management where the Selector List View Order values were manually updated.
