# **Release PV9.0.0 SV101**

## **Prerequisites**

Use OneStream Software platform version 9.0.0 or later with this version and Xperiflow version 4.0.1 or later.

## **New**

### **Bug Fix – Unsafe File Renaming**

- This update fixes an issue where using the Alter Dialog Flow to rename a file in the MetaFileSystem would ignore some edge cases relating to not changing the file name or supplying an improper file name.

## **Known Issues**

- Database tables with non-default schema do not yet have support for in-dialog alteration.
- Extremely large datasets or query responses may fail to load due to a “Stream was too long” error. In this case, consider breaking up your datasets into smaller chunks.

## **Contacting Support**

OneStream Support can be contacted at any time by registering at

<http://support.onestreamsoftware.com> and then emailing [support@onestreamsoftware.com](mailto:support@onestreamsoftware.com).
