Genesis Release PV9.0.0 GV101

The theme for this Hotfix release is a bug fix to correct the security group assignment functionality for Application Groups.

Fixed Issues

- For Admin, Config, and Help Application Groups, only users who are in the assigned Access Group can view the Application Group in the Genesis Navigation page. (GEN1-1349)

Upgrade Information

- To upgrade an instance of Genesis to the latest release, see "Upgrade an Instance" in the *Genesis Guide*.

Compatibility

- Minimum Platform Version 9.0.0 is required.
- The live Content Library service is currently supported only for customer cloud deployments. On-premises deployments should use the Genesis Instance Workspace library instead. Download the Content Blocks from OneStream Solution Exchange, and import them into your Genesis library.

Documentation

- Only the Release Notes were updated for this release. The *Genesis Guide* has not been updated except to change the release number.
