Release PV850 SV100

The theme of this major release is the introduction of the new functionality for exporting snapshot data to Dynatrace.

Prerequisites

- This solution is compatible with OneStream Platform v8.

New Features

- In Application Analysis you can export snapshot data to an Open Telemetry system like DynaTrace, allowing you to use your preferred tool to monitor OneStream systems. (MP3-6653)
- In DynaTrace you can see the AppName element, making installed applications easily identifiable when an environment has multiple apps. (MP3-6925)

Deprecation

- The following feature is scheduled for removal in this release in accordance with our sunset policy:
 - Live monitoring (MP3-6654)
