Release PV740 SV104

The theme of this release is bug fixes.

Prerequisites

- This solution is compatible with OneStream Platform version 8.0.
- This release requires a minimum OneStream Platform version 7.4.
- This release requires that the user who is doing the installation has a Security Cultural code of "English (United States)" or ISO code en-US. The cultural code can be reset after the installation if necessary.
- This release supports an over-install for Application Control Manager versions starting with PV710. Any modifications to business rules, connectors, defaults Import Add-On components must be redone. Reach out to your OneStream Software representative for questions regarding the over-install process.
- OneStream strongly recommends uninstalling the UI for Application Control Manager before installation. Any modifications to business rules must be redone.
- If the metadata import process seems to run more slowly after upgrade, select and then clear the Retain Source System Order checkbox in the left navigation bar on the Metadata File Import page.

New

None

Enhancements

None

Fixed

- A source system import performance issue has been resolved. (MP4-4764)

Known Issues

None

Documentation

Only the Release Notes were updated for this release. The Application Control Manager Guide has not been updated except to change the release number.

Release PV740 SV103

The theme of this release is bug fixes within Application Control Manager.

Prerequisites

- This solution is compatible with OneStream Platform version 8.0.
- This release requires a minimum OneStream Platform version 7.4.
- This release requires that the user who is doing the installation has a Security Cultural code of "English (United States)" or ISO code en-US. The cultural code can be reset after the installation if necessary.
- This release supports an over-install for Application Control Manager versions starting with PV710. Any modifications to business rules, connectors, defaults Import Add-On components must be redone. Reach out to your OneStream Software representative for questions regarding the over-install process.
- OneStream strongly recommends uninstalling the UI for Application Control Manager before installation. Any modifications to business rules must be redone.

New

None

Enhancements

None

Fixed

- An error will no longer appear when running Metadata Import with a user whose security culture is a non-English code. (MP4-4534)

Known Issues

None

Release PV740 SV102

The theme of this release is bug fixes.

Prerequisites

- This solution is compatible with OneStream Platform version 8.0.
- This release requires a minimum OneStream Platform version 7.4.
- This release supports an over-install for Application Control Manager versions starting with PV710. Any modifications to business rules, connectors, defaults Import Add-On components must be redone. Reach out to your OneStream Software representative for questions regarding the over-install process.
- OneStream strongly recommends uninstalling the UI for Application Control Manager before installation. Any modifications to business rules must be redone.

New

None

Enhancements

The following changes have been made as of PV740 SV100:

- Grouped Dim will now be turned on automatically by default when installing the application. The Grouped Dim checkbox has been removed from the Global Options page. (MP4-3225)
- Text field character limits have been removed, allowing users to enter values of more than 500 characters into text fields for both metadata import and user initiate requests. (MP4-3376)
- Dimensions can now be exported to a CSV format and saved to your OneStream File Explorer. (MP4-2903)

Fixed

- An error preventing storing and committing of Ownership Type, Percent Ownership, and Percent Consolidation changes when the value is set to default has been resolved. (MP4-3843)
- Importing metadata files with Retain Sort Order turned on will no longer generate an Index Out of Range error. (MP4-4230)

Known Issues

None

Release PV740 SV101

The themes of this release is bug fixes.

Prerequisites

- This solution is compatible with OneStream Platform v8.
- This release requires a minimum 7.4 Platform release.
- This release supports an over-install for Application Control Manager version 710. Any modifications to business rules, connectors, defaults Import Add-On components must be redone. Reach out to your OneStream Software representative for questions regarding the over-install process.
- OneStream strongly recommends uninstalling the UI for Application Control Manager before installation. Any modifications to business rules must be redone.

New

None

Enhancements

None

Fixed

- A bug preventing users from re-installing solution after a previous Uninstall UI has been resolved. (MP4-3876)

Known Issues

None

Release PV740 SV100

The themes of this release are enhancements and bug fixes to Application Control Manager.

Prerequisites

- This solution is compatible with OneStream Platform v8.
- This release requires a minimum 7.4 Platform release.
- This release supports an over-install for Application Control Managerversion 710. Any modifications to business rules, connectors, defaults Import Add-On components must be redone. Reach out to your OneStream Software representative for questions regarding the over-install process.
- OneStream strongly recommends uninstalling the UI for Application Control Manager before installation. Any modifications to business rules must be redone.

New

- Administration pages redesigned.
- Dimensions can now be exported into a CSV format. (MP4-2903)

Enhancements

- Users will now be able to select the request they would like to commit rather than committing all requests at the same time. (MP4-95)

  Detail Logging option is automatically turned on upon install. (MP4-2816)
- Users can now process Flow dimension changes in the application using User-Initiate or Metadata Import. (MP4-295)
- Scenario dimension changes can now be processed in the application using User-Initiate or Metadata Import. (MP4-2575)

- Cultural Description properties based on application setup can now be used in Application Control Manager. (MP4-2692)

Fixed

- Member and Dimension field sizes in SQL tables have been increased. (MP4-2054)
- An error with User Group property has been resolved. (MP4-3235)
- Extract tables are no longer missing columns. (MP4-3280)
- Source system import removes members for multiple dims assignment. (MP4-3338)
- ACM_Reports Business Rule should not be encrypted. (MP4-3345)
- Formula Error when using double quotes has been addressed. (MP4-3535)
- Having Move action only is not working with Metadata File Import. (MP4-3544)
- You can now add a member to multiple parents with the Grouped Dimension field specified. (MP4-3623)
- CheckDateFormat validation not working correctly. (MP4-3624)
- An error causing requests not to be visible when adding multiple approvers to the request has been resolved. (MP4-3653)
- Copying a Layout will no longer overwrite your existing layout, and assigned properties will show up selected. (MP4-3662)
- An error while loading and extracting configuration data has been resolved. (MP4-3669)
- My Queue Filter is now working. (MP4-3638)
- Updating User Security required all properties to be in the layout. (MP4-3739)
- You can now process an Add followed by a Copy for a member that already exists in the dimension library through Metadata Import. (MP4-3751)

Known Issues

None
